## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

- 1) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2) Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the lower part" in line 6. There is insufficient antecedent basis for this limitation in the claim.

Claim 6 cites the limitation, "the above-mentioned containment element is obtained directly on the vehicle". Please note that it is unclear to the examiner what applicant means by the term "obtained". The examiner has interpreted this claim in its broadest possible manner because of the vagueness.

### ***Claim Rejections - 35 USC § 102***

- 3) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4) Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Goupy et al (4029350).

In reference to claims 1 and 2, Goupy et al provides an impact adsorption device of the type comprising a honeycomb, where the honeycomb features a number of ribs that define respective outlets, having a hexagonal section, terminating in holes in a lower part of the honeycomb, the honeycomb being injection-molded in a plastic material. Please note that the last limitation of the claim cites that the material "can be plastic resin derived from polycarbonate or rubber-filled polypropylene", this limitation and claim 2 are not given patentable weight because the term "can be" is not definite. Please note that Carroll et al teaches the use of polypropylene and polycarbonate as a material used in an impact adsorption device.

In reference to claims 3-7, Goupy et al provides an impact adsorption device where the honeycomb has a taper (figure 9) at one of the ends and a deformation containment element, made of high resistance material, wrapped around the tapered end. The examiner takes official notice that the containment element must be made from a high resistance material in order for the impact device to operate correctly. The containment element of Goupy can be attached or be part of a vehicle.

### ***Conclusion***

5) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bricmont et al, McFadden et al, Araki et al, Niemerski, Tate, Vismara, and Chase all provide energy adsorption devices. Carroll et al teaches the use of different materials that can be used as energy absorption materials.
